

Lagondaforum: Bonnet panels

Bonnet panels

Written by BSA500 at Jan 16, 2016 6:51 pm

I have what appears to be a late 1920's early 30's Lagonda body(may be a copy). The dimensions match closest to the 2/3 litre models. I have been trying to track down the front bonnet panels and have missed a few on ebay. I have included a link to the last set that was on ebay so you can have a better idea what I am looking for

I will also be upfront and say I am looking to spend around the £100 mark(that's what they have going for). Has anyone got a set they wish to sell? . This not a whole Lagonda the chassis is an early SS2 Jag and other bits so copies are not an issue. I am in the UK.

Many thanks in advance
