LG6 Rapide in "Silent Service"

"Silent Service" is a pretty good 1950s American TV series, with each episode following the exploits of a particular submarine. Unlikely, one would think, for one of our favourite cars to appear, yet here we are!

The Rapide appears at 1:25, and again right near the end. I'm pretty sure it has to be an LG6 as no offside exhaust is visible, and no grille to be seen in the bonnet side panel. The driver is also pretty attractive!
