It's a trunnion mounted radiator normally found on a late 2 Litre (around 1931). Very useful having the correct thermostat as well. Nice.

HELP! This is the radiator off my car which was stolen from my workshop along with the headlamps ,horn, all brackets and mountings plus 5 badges including the rare L2 Lagonda badge, VSSC, 2 Brooklands and club badge whilst I was on holiday. Please keep a look out as the more eyes the better. Police involved and Ebay Fraud. If you have purchased the radiator in innocence please contact me . I can prove this is definitely the radiator from my car .

Very sorry to hear this Nigel and I hope you get all your parts back. From the legal point of view, I hope you know that no one who buys these parts can get legal title to them as ownership has not passed from you. Once you can prove these items are yours they must be returned to you and you do not have to pay anything to any "purchaser" - whether innocent or not. Best of luck with your efforts.

More to the point let's hope it leads the police to catch the thieving scum.

This is awful. I have advised the club spares committee so no doubt the word will get around pretty quickly now. Good luck Nigel.

I have taken the liberty of placing this on the Lagonda Facebook page Nigel. Hope that's ok with you.
