2 Litre LC Running Board Aluminium Edging

Written by Mark at Aug 20, 2017 3:55 pm

I am trying to help the club spares committee identify the correct profile aluminium edging fitted to the low chassis pointed running boards. Two types have turned up of slightly different profile and it is not certain which is correct to the original.

The club need to have new extrusion tooling made and wish to ensure the correct profile is specified.

Would anyone have an original pointed running board with it original aluminium edging or simply a piece of old/original aluminium edging that could be loaned or donated to the club?

Please search your garage or spares collection and if you can help could you contact me. (Y2 in the club register)

Thank you
Mark
