

Lagondaforum: Pre war Lagonda roadtests and Scintilla Vertex literature

Pre war Lagonda roadtests and Scintilla Vertex literature

Written by h14 at Sep 15, 2017 12:27 pm

I have the following surplus, so propose bringing to the Lagonda Annual Gathering spares etc tent on the Sunday:

ORIGINAL

Sept 1936 Motor "The latest 4 1/2 litre Lagonda for 1937" includes write-up, test and several pictures/photos. LG45 drophead, tourer and Rapide

Nov 1936 Motor "The 4 1/2 litre Lagonda Rapide" includes write-up, test and data, nice photos!

Oct 1937 Autocar "The 1938 Lagonda V12" Superb full page Gordon Crosby cut-away drawing, plus basic specification.

Oct 1937 Autocar "The Lagonda Programme" Fairly detailed technical information, mainly V12 but one paragraph on LG6. Drophead, toure, and saloon de ville illustrated, plus LG6 engine.

Sep 1938 Motor "The Lagonda V12 saloon" Photos, write-up, road test and large "visual" data sheet.

Each £4 except V12 drawing: £5

REPRINT

"Scintilla Vertex Magneto Fitting & Maintenance Instructions" illustrated, much useful info

"Scintilla Spare part list for Vertex Magnetos" Specifically for the NV series (LG45 and LG6 have NV6 magnetos); comprehensive list of all parts (and prices, very low, but sadly in £ s d!) plus all parts photographed...very useful.

Each £3

If you wish, pre-order and I will hold ready for collection at the meeting...or post, P&P extra.

Laurence
