Sidelights

Good evening Lags...

I am desperately searching one or a pair of sidelight stalks for my car. I have one (driver's side) which I bought from an auto-jumbler who had just sold the other of the pair! The Great Lagonda Race beckons, so I am a bit up against it... all help much appreciated.

May be able to help. I have a pair of stalks, replaced by new ones, not very good condition but may get you over your problem.
