Lagondaforum: cigarette case

cigarette case

Written by Peter S30 at Feb 24, 2011 7:33 am

Robin was asking in the club newsletter how the vanity/cigarette case is fixed in the locker lid, so here it is: three srews. There is a groove in the lid where the case fits in. The little flat part I am holding up with my finger is spring loaded (to hold notes may be). There is a mirror in the lid, at least in mine, which does not leave much space for cigarettes so may be smokers would remove it.

I have a case which shows no sign of mounting in a glove box, with a post-war Lagonda badge glued on the front: is this a genuine article and if so which car might it be from?
