Colin,

Well, one never knows, of course.

I suppose that I'm equally 'well coupled in' with the AMOC 'DB Lagonda team'. Perhaps we should have a summit meeting at some point.

Regards,

Tim

Arnold's Newsletter arrived yesterday with a UK vendor offering what appears to be a substantial quantity of DB3L bits - but I won't post contact details here

Might I suggest that you contact Jeff Leeks, he has all the parts for a complete 3.0 litre 4 door. including chassis, body etc. All separated and restored already.

He is not cheap, but given he has sold much off this car already, he may be worthwhile speaking to. I know he has a restored chassis frame, which you are looking for.

Best of luck, and email me if you would like his phone number.

Simon
