

## Lagondaforum: Set of new V12 pistons for sale

### **Set of new V12 pistons for sale**

*Written by h14 at Sep 15, 2012 5:28 pm*

I have a set of V12 pistons for sale, made to the original factory pattern, but with 8.3:1 compression ratio to take advantage of modern fuels. Better petrol consumption, cooler running and better performance.

They are standard, not oversize, complete with rings & gudgeon pins.

Reason for selling? I had these made as I understood that all V12 blocks proved to be porous on test, so planned to liner mine to standard size.

Needless to say, mine proved the first block not to be porous, so I had another set of pistons made oversize, thus these never got used.

You could of course have the compression landing machined down if you prefer a lower comp. ratio.

A bargain at £1500 for top quality pistons made by people that used to work for Wellworthy. I'm living in France so could accept euros at a mutually acceptable exchange rate.

P&P / courier extra, but can bring them to the AGM meeting next month.

PM for photo/contact

Laurence
