

Lagondaforum: V12 Speedometer & Rev Counter

V12 Speedometer & Rev Counter

Written by sroope at Dec 30, 2012 1:55 pm

I am looking for the original Smiths AT 5" instruments fitted to the V12 or LG6. The Speedometer is 0-120 MPH and Rev Counter 0-6000 rpm.

Seeking complete instruments or individual parts or dials, in any condition.

All offers or possible sources would be very much appreciated.

Many thanks

Simon

Mark Whitehead at y.ted@bigpond.com has a speedo and rev counter he can help you with, he was helpful for me recently with other instruments and has confirmed he would welcome your contact.
