Coys are auctioning the museums contents on the 12th and 13th of October. Some fascinating things amongst them is this superb 1937 LG6 Dhc.

Looks like a nice car. I hope the vendors get paid once the auction is over...

The description reads well.

"all the dashboard instrumentation is original and correct..."; yet the dashboard photo clearly shows a smaller modern instrument inserted above the steering column. I hope the rest of what is said is more accurate!

Nevertheless an interesting car, and good to hear that FPJ553 survives. Strange it was allocated an (apparently duplicated as well) chassis number, yet is registered with the "true" E3007. Helpful as it also explains the early engine number in a (faux) late chassis.
